Operations / POS	Below
People	Exceeds

POS: registers went down Tuesday 10/6 from about 2:10pm to 5:40pm. Team kept selling on manual slips and keyed everything in Wednesday morning, so Tuesday shows low and Wednesday inflated in the flash report. Tyler estimates 60% of Tuesday's tickets moved to Wednesday. IT root cause: network switch, replaced.

Campaign: the team says the bus shelter ads on Broadway brought some new faces, traffic feels a bit up, nothing dramatic.

Product: IRIDIA black and off-white getting asked for since the weekend (the K-pop thing), we have a few. VEL zipper returns, 8 last week. ASTRA : 1 cape sold since launch, clients try the oversized and say it runs small, price is the bigger issue.

People: Ana did a great job handling the outage, clients were very understanding.

Follow-ups

- Confirm with Finance that 10/6 sales were re-dated to 10/7 (flag for comp reporting) – LM – 10/9
- VEL returns: follow QA-26-017 – TB – ongoing
- ASTRA : ask Nicole Park about transfer out to Asia – LM – 10/15
